Project Milestone 2
The Underscores
014_7
Camden Billingsley, Kai Dewey, Blake Larson, Forrest Lazzara, Elizabeth Shan

**Project Features List**

1. User Login
   a. Users will be able to log in to their own personal account that saves their information from session to session. Things like schedule, events attended, and previous destinations will all be saved
2. Campus Map
   a. Users are able to see an entire map of campus and get directions between buildings. The buildings will also have floor layouts to help find classes easier.
3. User Calendar
   a. Users will be able to edit their calendars and set a reminder. Users will also be able to see their schedule for the day along with the current time. Users will be able to toggle through daily, weekly and monthly schedules.
4. Schedule Planner
   a. Users will be able to look at the course catalog for next semester and start to plan out their schedule. The planner will also have an option to see a weekly calendar view so users can have a better understanding of what their potential schedule would look like. The planner will also have functionality for booking day-to-day events, such as reservations at the Rec Center. Users will also be able to look at class requirements for a given major.
5. Events Page
   a. Users can see CU events and also create their own events that will appear to other users. Users can filter through events in certain categories of their liking.

**Requirements:**

| User Login | |
|---|---|
| | As a user I want to be able to login to my account so I can access my account |
| | As a user I want to be able to create an account so I can access member only features |
| | As a user I want my account to be secure so that others cannot see my information |
| | As a user, I want to be able to list certain details about myself (major, interests, etc.) so that I can get recommended events |
| | As a user, I want to be able to reset my password so I don't get locked out of my account |
| | As a developer I want to be able to track user account information so I can make better event/class recommendations |
| Campus Map | |
| | As a user I want to be able to pull up the campus map |
| | As a user I want to be able to get directions to certain places |
| | As a user i want to be able to see where events are located in the map |
| | As a user I want to be able to place |
| | |
| User Calendar | |
| | As a user I want to be able to see upcoming CU events |

| | |
|---|---|
| | As a user I want to  add events to my calendar |
| | As a user I want to be able to see my class schedule for the day so I make it on time |
| | As a user, I want to receive notifications before an event so I don't miss them. |
| Schedule Planner | |
| | As a user I want to be able to look at available classes for next semester so I can think about which ones I want to take |
| | As a degree-seeking student I want to get recommendations for potential classes to take next semester so I graduate on time |
| | As a busy guy, I want to be able to see the weekly layout of my potential schedule so I know what my days would entail |
| | As a user, I want to see past due items so I can specially deal with them. |
| | As a user I want to be able to have the website automatically sign me up for specific time slots at the rec center |
| Events Page | |
| | As a user I want to be able to create events |
| | As an event creator, I want to be able to add filters that effect which people see the events |
| | As an event creator I want to be able to make my events invite only or public |
| | As a user, I want to be able to view events in a chronological list so I find upcoming events |
| | |

|  |
|  |
|  |

**Individual Contributions**

Kai -
Configured webpack in the repository so javascript scripts are easier to manage. Configured eslint so code formatting is more consistent.
Latest commit: add .log to .gitignore

Blake -
https://github.com/CSCI-3308-CU-Boulder/3308SP21_section014_7/commit/bff774839d0c633fae965c9d6ac692f921e9c662
Set up a MySQL database to store user accounts and created a register form.

Forrest -
https://github.com/CSCI-3308-CU-Boulder/3308SP21_section014_7/commit/4ac8680fa8568117b69d19b2c508975080b3e1fa
Started work on an html form for users to create their own events. Also helped test out registration feature.

Liz -
https://github.com/CSCI-3308-CU-Boulder/3308SP21_section014_7/commit/a398c6d969aa5418b8532c4e65ac1898b25b81ea
Added HTML 404 page. Uploaded icons (as pdf) in assets folder for future use

**Camden** -
https://github.com/CSCI-3308-CU-Boulder/3308SP21_section014_7/commit/e160d63939e77a978fe8c3c495770a8595b43fb9
Created a first draft on an about page that can be updated later.
